

HANIF AHMAD RIZQULLAH

FullStack Developer

Bandung, West Java, Indonesia | [WhatsApp](#) | [Email](#) | [LinkedIn](#) | [Portofolio](#) | [Youtube](#)

SUMMARY

Proficient in modern web development technologies, including Next.js, React, Express, Node.js, and PostgreSQL, with hands-on experience building dynamic projects such as event ticketing systems and company profile websites. Passionate about computer technology and committed to advancing skills in software development. Besides the hard skills mentioned, improving soft skills is not forgotten due to helping me reach out to others and working together.

PROJECT EXPERIENCE

- **Photo-booth Desktop Application**

Keeping events memorable is one of the people's desires nowadays. Keeping on photos is one of the most favorite ways to keep it memorable. That's why this app is built, we provide a desktop application which is sold to a client who wants to build a photo-booth. All in one app, including payment with midtrans and xendit, API integration with printer and canon camera, make it easy to use just in a single app.

- **Web Event Ticketing**

Selling tickets for an event is challenging due to the wide range of media platforms available for selling products. Tickets can be hard to sell as they compete with the other products. Our goal is to simplify the ticket-selling process by unifying the process in a single platform. We provide the platform that everyone can become an organizer, creating events, and selling tickets, making it easier for event seekers to buy the ticket on a single platform. As aggregators we connect sellers and buyers in an efficient way.

- **Web Company Profile**

Introducing a company can be challenging when it's not accessible. Our goal is to create a company profile in the form of a website. Website serves as a hub that provides an introduction of the company, review, track record, and the other essentials to enhance its recognition. With this company profile website, anyone can learn about the company simply by visiting the website, making it easier to introduce the company to the world.

- **CMS Blogger**

Bringing ideas to life online has become common in this digital era, and everyone needs a platform to share them. Our goal is to develop a website that showcases people's ideas in the form of a blog. The content is input into a CMS, allowing us as developers to fetch the API and structure the data for our blog. While the concept is simple, it enables ideas to reach a wider audience across the internet.

SIDE PROJECT

Content Creator

- Creating content script
- Creating slide of points
- Observing topic
- Editing content
- Uploading content

WORK EXPERIENCE

SSNAPP

Intern Full-Stack developer (Mar 2025 - now)

- Improving desktop application
- Debugging vulnerable code
- Building app features
- Restyling app components

EDUCATION

- **Purwadhika Digital Technology School (2025),**
Fullstack Web Developer
- **Polytechnic Bandung (2023 - 2024)**
Informatics, resign

LICENSES & CERTIFICATION

- **Purwadhika Digital Technology School (Feb 2025)**
Fullstack Web Developer
- **CodePolitan (Jan 2024)**
Javascript Document Object Model
Link:  CodePolitan JS DOM.pdf
- **Dicoding (Nov 2023)**
Dasar Pemrograman Web
Link:  Dicoding Dasar Pemrograman Web.pdf

SKILLS

- HTML5
- CSS3
- JavaScript (ES6+)
- React.js
- Next.js
- Tailwind Css
- Node.js
- Express.js
- Postgresql
- Vue.js
- Git & Github version control
- Electron
